Tenney T-Shock Junior Thermal Shock Chambers

The Tenney T-Shock Junior is a bench-top thermal shock chamber with a 1/4 cubic foot carriage capacity. It's designed to accommodate pilot runs and smaller production quantities of sophisticated, discrete components.

The T-Shock Junior provide an cost-effective alternative to larger capacity units.

Junior Thermal Shock Chamber Features

- ➔ Vapor-tight interior liners made of 100% continuously welded stainless steel
- ➔ Control system provides fully automatic, PID, chamber control through a user-friendly alpha-numeric display
- ➔ Available in horizontal or vertical configurations
- ➔ Available in two or three zone operations
- ➔ Carriage transport is automatically positioned and includes a large wire mesh stainless steel product basket
