**Model DC2500A, M1, M2 Model DC2500, M2 through M6 Dual Directional Coupler, 2500 Watts CW  
10kHz–250MHz**

AR Model DC2500A is a high power ultra-broadband coupler with excellent performance characteristics over a range of more than 14 octaves. This dual directional coupler is a convenient means of simultaneously monitoring forward and reverse power in high power systems using normal laboratory oscilloscopes, voltmeters, power meters, and spectrum analyzers. Model DC2500A is recommended for use with our A and L series amplifiers, and other amplifiers operating within the frequency and power range.
