

rf/microwave instrumentation

**Model FL7040**  
**Electric Field Probe**  
**2MHz–40GHz**  
**2–1000 V/m**  
**User-Selectable X, Y, Z Axes**

The FL7040 is a smart, fast, extremely accurate electric field probe that contains an internal microprocessor to provide linearization, temperature compensation, control, and communication functions. Noise reduction and temperature compensation allow accurate measurements down to 2 V/m without zero adjustment. Microprocessor based linearization technology provides a 54 dB dynamic range. When rotated about its critical angle mount, the probe provides typical isotropic response of  $\pm 1.5$  dB to 40 GHz.

The FL7040 is laser powered to allow for continuous operation without recharging or battery replacement.

Correction factors are provided with the probe. These factors can be loaded into the Model FM7004 Field Monitor (sold separately) to automatically correct the probe readings at user-specified frequencies. When correction factors are applied, the true accuracy of the probe can be realized.

The FL7040 communicates through glass fiber optic cables, up to 100 meters long, to the FI7000 interface. X, Y, Z, and isotropic readings can be returned through an FI7000 in 20 msec.

*NOTES: This probe requires an FI7000 for power and communication.  
 FM7004 is recommended for local monitoring and control.*

FL7040 Typical Uncalibrated Frequency Response

FL7040 Typical Calibrated Frequency Response (with correction factors applied)

## SPECIFICATIONS, FL7040

### Amplitude Accuracy (field aligned with sensor axes)

Without correction factors applied .....	±1.0 dB @ 10 MHz
With correction factors applied .....	Typical expanded measurement uncertainty (95% confidence interval)
	0.8 dB, 2 MHz–1 GHz
	1.4 dB, 1 GHz–40 GHz

Response Time/ Sampling Rate (through FI7000)..... 20 msec/up to 50 samples per second, USB and GPIB only

Isotropic Deviation (measured at the critical angle)..... ±0.5 dB @ 10 MHz  
±1.5 dB, 2 MHz–40 GHz (typical)

Operating Range ..... 2–1000 V/m

Linearity, 2 to 1000 V/m..... ±0.5 dB

Temperature Stability..... +0.5 dB over operating temperature range

Damage Level..... 1200 V/m CW

Ranges ..... Single continuous range

Data returned from probe ..... X, Y, Z axes, and composite

Power Requirements ..... Laser powered from FI7000 interface

Dimensions ..... Approx. 278 x 65 x 65 mm

Probe Head Diameter..... 65mm

Weight ..... 150g approx.

Operating Temperature Range ..... 10°C to 40°C (50°F to 104°F) @ 5% to 95% RH non-condensing

Fiber Optic Connectors ..... Two E2000 compact duplex connectors at 1 meter, includes fiber optic verification loop.

Calibration Data ..... Accredited Calibration Report (A2LA) supplied with probe
