

Rent PIM Hunter Solutions

Passive Intermodulation Testing

The PIM Hunter Test Probe helps field technicians discover the precise location of external PIM sources at cell sites. Designed for use with Anritsu's PIM Master and handheld spectrum analyzers, the PIM Hunter test probe enables field professionals to use traditional interference hunting techniques to accurately locate external PIM sources for optimum wireless network performance.

Anritsu's patented Distance-to-PIM (DTP) technology that determines the distance between the antenna and external PIM. A technician can walk along the arc of that distance with the PIM Hunter tool to detect the exact source of the external PIM.

Key Features

- Pinpoint External PIM (outside the antenna system)
- PIM Hunter solution is a specialized antenna to identify intermodulation products from 600 to 2700 MHz
- Operates with the Spectrum Master MS2720T or BTS Master MT8220T in burst detect sweep mode and bandpass filter.
- Operates with Spectrum Master MS2712E or MS2713E, Cell Master MT8212E or MT8213E, and Site Master S332E or S362E with custom settings and bandpass filter.
- PIM Master is required to generate the primary test tones to generate IM products for the PIM Hunter to locate

THE EQUIPMENT YOU NEED

AC Hipots
AC Loads
AC Power - Electrical Meters
AC Power Supply
Active Filters
Antenna Alignment Tools (AAT)
Attenuators
Audio Analyzers
Automotive Transient Test Systems
Back Reflection Test Sets
Battery Test Systems
Biconical Antennas
Biological Antennas
Bit Error Rate Testers (BERT)
Borescopes | Video Scopes
Cable & Antenna Analyzers
Cable Fault Testing
Calibration Kits
Cellular Network
Charge Amplifiers | Accelerometers
Comb Generators
Conducted LF/RF Immunity Test Systems
Component Testing
Conducted Emissions
Conducted Immunity
Conducted LF/RF Immunity Test Systems
Conical Antennas
Coordinate Measurement Machines
Copper Cable Certifiers
Current Transformer Test Sets
CW Amplifiers
Damped Oscillatory (DOW) Generators
Data Acquisition
Data Loggers
Data Network
DC Hipots
DC Loads
DC Power Supply
Digital Microscopes
Digital Multimeters (DMM)
Digital Storage Oscilloscopes
Dipole Antennas
Directional Couplers

Directional Interference
DLRO | Contact Resistance
Ohmmeters
E-Field Probes
EFT-Burst Generators
Electrical Calibrators
Electrical Safety Analyzers
Electrical Standards
EMC Antennas
EMI Receivers
EMI Scanners
EMP Generators
Environmental Chambers
ESD Guns
Facility Power Monitoring
Fiber Certifiers
Fiber Optic Testers
Fiber Splicing Machines
Field Cameras
Field Monitors
Field Strength Monitors & Probes
Flow Meters
Force Tester | Load Cell
Function Generators | ARB
Fusion Splicers
Gauss Meters & Magnetometers
Grid Simulators
Ground Resistance | Earth Testers
HALT / HASS Chambers
Harmonics & Flicker
HART Field Communicators
Helium Leak Detectors
High Speed Cameras
Hipot & Cable Testing
Horn Antennas
Humidity Chambers
Impedance Analyzers
Impulse Generators | Thumpers
Indirect Lightning Test Systems
Indoor Air Quality
Industrial Electrical Testing
Industrial Hygiene
Insulation | Ground Megohmmeters

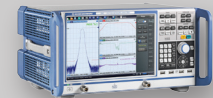

Iconograph | Ionic Contamination
Lab DC Power Supply
LAN Cable Testers
Land-Mobile Radio (LMR)
Laser Diode Controller
Laser Doppler Vibrometers
Laser Micrometers | Optical Micrometers
Laser Shaft Alignment
LCR Meters

LISNs
Lock in Amplifiers
Log Periodic Amplifiers
Loop Antennas
Low Loss Cables
Machinery Maintenance
Materials Test
Military & Aerospace Transient-Generators
Mixed Domain Oscilloscopes
Mixed Signal Oscilloscopes
Monitoring and Inspection
Monopole Antennas
Motion Testing
Motor Analyzers
Multifunction Process Calibrators
Near Field Probes
Noise Figure Analyzers | Noise Sources
Oil Dielectric Testers
Optical Spectrum Analyzer (OSA)
Optical Time Domain Reflectometers (OTDR)
Oscilloscopes
Ovens
Partial Discharge Testers | Corona Testers
Particle Counters
Particle Impact Noise Detection (PIND)

Passive RF Devices
Personal RF Monitors
PIM Testing Equipment
Power Factor Test Sets | Tan Delta
Power Loggers
Power Meters
Power Monitoring
Power Quality Analyzers
Preamplifiers
Precision Power Analyzers
Pressure Calibrators
Primary Current Injection
Protective Relay Test Sets
Pulse Amplifiers
Pulse Pattern Generators
Pulse Magnetic Field Generators
Radiated Emissions
Radiated Immunity
Radiation Meters
Radio Network
Radio Test Sets
Recirculating Chillers
RF Current Monitor Probes
RF Enclosures | GTEM
