#### NETWAVE - SIMULATION OF THE MOST REQUIRED POWER SUPPLY PHENOMON

The NetWave Series (3-phase) are three-phase AC/DC power source, specifically designed to meet the requirements as per the standards IEC/EN 61000-4-13, -4-14, -4-27(\*) and -4-28. It is also used as a DC power source to cover the requirements as per the standards IEC/EN 61000-4-17 (Ripple on DC) and IEC/EN 61000-4-29 for voltage dips and interruptions on DC supplies. The NetWave series is well suited for testing inverters (e.g. solar power, wind power) and e-vehicles. Additionally, the NetWave series (3-phase) offers the necessary capabilities for avionics testing as per DO-160, Airbus ABD0100 and Boeing as well as per MIL-STD-704.

Optionally the NetWave 3-phase series can be equipped with a power-recovery module to absorb fed-back power (AC/DC) up to nominal power of the NetWave. (\*) pre-compliant
