Bench-Top Type Temperature (& Humidity) Chamber

SH·SU

Characteristics

Stacked chambers (on stands)

Test area (60L model)

● Full variation to select from

With its 3 temperature range patterns (to -60 , -40 or -20°C), and 2 volumes (20 and 60L) selection, the Bench-top chambers offer 10 models in temperature or temperature/ humidity configuration, to fulfill customers' needs.

● Light and small structure

The chamber structure is optimized to save space while offering a wide test area (22.5L for 1st model). Its relatively light weight allows setup almost everywhere.

● Full-size chamber performance in a compact design

The SH-661 model achieves -60 to $+150^{\circ}\text{C}$ temperature range and 30 to 95%rh for humidity in a small structure. It shows undoubtedly better performance than any other previous bench-top model.

● A refrigeration system that reduces energy consumption by 55%

Our exclusive refrigerator system with capacity control achieves 55% reduction in power consumption compared to our previous model. (SH/SU-221·241 models)

● Easy wiring access

The chamber features free access to the test area. Cable ports are provided on both right and left side to allow easy wiring of specimens for measurement or voltage application.

Characteristics

● Layout arrangement thanks to additional stand (option)

L and H stands are equipped with casters, and allow easy storage to optimize your testing zone. L stand is lower to fit under H stand and stack chambers. (L=Low, H=High)

* It is recommended to secure stands to the floor with provided anchor bolts.

Stands (option)

● Easy water supply

Water is supplied from the front side tank (equipped with a level sensor). Auxiliary water tank circuit (option) is also available for extended operation time. (SH model)

Water supply tank

● Right-opening door (option)

The door opening can be reversed to fit your installation space.

Right-opening door (option)

Viewing window (option)

Characteristics

Example: Bench-top Type Temperature (& Humidity) Chamber connected with the Ion Migration Evaluation System (sold separately)

Paperless recorder Portable type (option)

Cable port plug (Material marked)

● Ion migration evaluation

The Bench-top chamber can be combined with ESPEC's Ion Migration Evaluation System (AMI) to ensure even more accurate evaluation results.

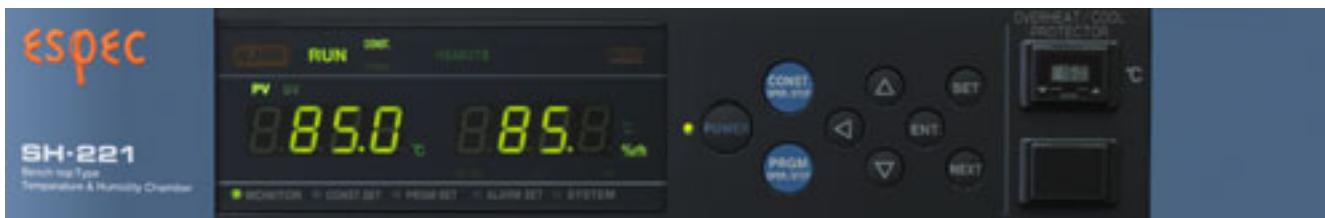

● Paperless recorder (option)

Portable type, to record temperatures from various sources, such as test area temperature. Recording is possible on Compact Flash Card or via USB port.

● Material labeling for easy recycling

Plastic molded components are labeled and easily detachable to make recycling easier for future disposal of the equipment.

Control operation

● Key input setting

Easy setting of temperature and humidity values, but also upper and lower temperature (& humidity) limit alarms, by mechanical key input.

● Program operation up to 9 steps

Besides constant setting, program operation is available by setting different patterns (9 step/ pattern) of heat up and pull down temperatures, to meet requirements of temperature characteristic test or temperature (& humidity) cycling. The instrumentation additionally offers various functions.

● Flexible communication interface

An RS-485 connector is equipped as standard, but RS-232C or GP-IB is also available as option.

● Remote control from your PC

Using "WEB Manager" (converter sold separately) and an intranet to connect the chamber and a computer makes it possible to edit profiles and perform monitoring from the computer.

Viewing window

SH/SU-221, 241, 261 W215×H215mm

SH/SU-641, 661 W215×H315mm

When equipped with a viewing window, chamber performance are as follow:

Temperature uniformity :

±1.0°C (-20 to +100°C)

±1.5°C (-100.1 to +150°C)

Humidity uniformity : ±5.0% rh

Temp. heat up rate:

Inner door

Glass door provided inside the chamber, to observe the conditions of the specimens.

* A wiper is included for SH models.

* This option is not compatible with a viewing window or right-opening door.

* Used for observation of the specimens inside the chamber.

SU model

OPTIONS

Right-opening door

Door can be changed for a reverse one (hinges on the right, handle on the left)

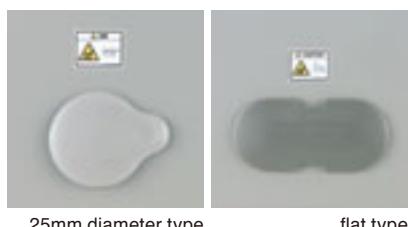

* This option is not compatible with inner glass door option.

Additional cable port

Provided in addition / replacement of the standard cable ports.

- 25mm diameter
 - 50mm diameter
 - 100mm diameter
 - Flat cable port (W100×H25mm)
- * Each cable port is equipped with a silicone sponge rubber plug.
* Basic specification of the chamber may not be met when equipped with a cable port.

Cable port rubber plug

Prevents air leakage from the cable port.

Auxiliary water tank circuit (SH)

Used to automatically refill the standard tank with the auxiliary water tank.

Required water quality:

Conductivity 0.1 to 10 μ S/cm

Water supply pressure:

4.9 to 19.6KPa (Gauge)

Auxiliary water tank (SH)

Used to refill the standard tank.

Tray for auxiliary tank (SH)

Prevents water leakage during standard tank refill process.

Shelf

Equivalent to standard accessory:

〈SH/SU-221, 241, 261〉

Effective size: W200×D150mm

Load resistance: 500gr.

〈SH/SU-641, 661〉

Effective size: W300×D300mm

Load resistance: 5kg.

Specimen basket

Equivalent to standard accessory.

Material: Stainless steel (5 mesh)

Stand

Enhances the mobility of the chamber, and facilitates load/ unload of specimens.

L stand can fit under the H stand to save space.

* Be sure to secure the stand to the floor with the provided anchor bolts.

- L stand

SH/SU-221, 241:

Safety precautions

- Do not use specimens which are explosive or inflammable, or which contain such substances. To do so could be hazardous, as this may lead to fire or explosion.
- Do not place corrosive materials in the chamber. If corrosive substances or liquid is used, the life of the unit may be significantly shortened specifically because of the corrosion of stainless steel, resin and silicone materials.
- Do not place life forms or substances that exceed allowable heat generation.
- Be sure to read the user's manual before operation.
