UCS 500N5E - EFT/BURST GENERATOR THAT GOES BEYOND STANDARD REQUIREMENTS

The UCS 500N5E is a new dedicated EFT/Burst generator based on the successful UCS 500N series of ultra-compact simulators. Offering all the benefits of the well-known UCS 500N5 it is designed as a Burst generator only. This makes it the full performing Burst tester as per IEC/EN 61000-4-4 with the best benefit-to-cost ratio yet upgradeable to include other test abilities such as Combination Wave Surge and PowerFail.

Apart from its built-in single phase test capability it is extendable for testing three-phase DUTs by means of automatically controlled external coupling networks up to 100A. EM TEST supplies a large range of accessories for various applications.
